

# The AUMUND Group

Expert in all major industries

The **AUMUND Group** with its product companies **AUMUND Fördertechnik**, **SCHADE Lagertechnik** and **SAMSON Materials Handling** offers products of high technical standard and solutions for a variety of applications wherever conveying and storing of bulk materials is required.

The products are used in the cement industry, power plants, iron and steel plants, the mining and mineral processing industry, chemical and fertilizer industry and bulk terminals on all continents. Confirmed by over 18,000 installations in more than 140 countries, AUMUND is a trendsetter in conveying technology as a result of research and development and customer driven improvements.

## **AUMUND Fördertechnik GmbH**

based in Rheinberg/Germany is a global market leader specifically specialized in the transportation of hot and abrasive materials and the storage of bulk solids.

The product portfolio includes bucket-, plate- and chain- conveyors, silo technology and discharge systems. The products are used particularly in the cement industry, the iron and steel industry, in mining & minerals, in power plants and for producing alternative energy sources. Services include spare part procurement, assembling, replacement, conversions and modernization.

### **SCHADE Lagertechnik GmbH**

based in Gelsenkirchen/Germany is a global market leader in designing and equipping blending beds, bulk storage depots and wagon unloading systems. The products and concepts are used, for example, for storing, reloading and blending coal, limestone, iron ore and fertilizers.

They are mainly used in the cement, chemical, minerals and mining industry, at power plants, in steel, iron and aluminium plants, and at ports and terminals.

### **SAMSON Materials Handling**

based in Ely/GB is an expert in mobile materials handling equipment for surface installation. With over 45 years of experience SAMSON is dedicated to providing a range of innovative solutions for bulk materials handling for all kinds of industries. The reliable, quality products are designed to meet a wide range of application requirements.

Flexibility, reliability, quality and performance are at the core of the product concept; from truck intake, using the unique Samson® Material Feeder, through to mobile stacking and ship loading solutions.

### **After Sales, Field Service and PREMAS®**

A major asset of the AUMUND Group is the global AUMUND Group Field Service as well as the PREventive MAintenance Service PREMAS® providing specialist assistance to plant operators, qualified hands-on service, spare parts, inspection, training and consulting keeping the plants' operating staff updated with all maintenance issues.

### **AUMUND Group Worldwide**

In conjunction with the headquarters of the manufacturing companies, the global conveying and storage technology business is spearheaded through a total of 15 locations in Asia, Europe, North and South America and 5 Service Centers and Warehouses in Germany, USA, Hong Kong, Brazil and Saudi Arabia.
