Machinery Optimisation

Conversions & Retrofits

Since almost 20 years AUMUND improves older equipment successfully to the new technical standards and performances.

The material handling equipment will be improved and optimised to the state of the art.

- Considerable cost savings compared to new machinery
- Technical update to the state of the art
- Increase of capacity and performance
- Less maintenance
- Quicker commissioning and less down time due to remaining steel construction

Contact: conversion@aumund.de

Field Service

Onsite worldwide

AUMUND Group Field Service GmbH performs services for all associated AUMUND Group Companies, and operating subsidiaries throughout the world. In addition, the Field Service Team tenders also for work outside the Group.

- Solving the technical requirements
- More than 50 strategically located Service Professionals worldwide
- Onsite availability within 2 days

Contact: info@aumundgroup-fieldservice.com

Technical Trainings

AUMUND Days

Plant and operation managers, technical management as well as repair and maintenance personnel are trained to operate and maintain AUMUND equipment. The training takes part onsite as well as in conference and training centers by well educated and experienced AUMUND trainers and specialists.

- Avoidance of unscheduled shutdowns
- Protection of key components
- Elimination of operating failures
- Reduction of premature wear
- Reduction of operational and maintenance costs
